

BEFOUR YOU KNOW™

The Color
will Show™

For 2 to 4 Players
Ages 7 & Up

Contents: Game Board, 64 Game Tokens
(15 of Each Color and 4 Wild), 4 Player Tokens,
Token Bag.

Rules

Object

Make 4 in a row—either vertically, horizontally, or diagonally—with Tokens of your color.

Set-Up

- Put the Game Board and 4 white Player Tokens color side down in the middle of the playing area.
- Each player **secretly** takes a Player Token. After you look at your color, put the Token color side down in front of you. You need 4 in a row of that color to win.
- Place all the colored Game Tokens including wild in the Bag and shake it to mix them up.

Play

- The oldest player goes first, with play moving to the left in a clockwise direction.
- On your turn, close your eyes and grab a Game Token from the Bag.
- Place the Token on any square on the Board. It might be your color or another player's color.
- Play continues until the Board contains 4 Tokens of the same color in a row.

Wild Tokens

- When you pick a Wild Token, place it on any square on the Board without declaring what color it represents.
- All players can consider a Wild Token to be whatever color benefits them. For example, the Red Player would want the Wild Token to be red.
- Players can use up to 3 Wild Tokens for their 4 in a row. In other words, a winning row needs only 1 Token with that player's color.

Winning

The winner is the first player to make 4 in a row with Tokens of their color! The row can be a combination of the player's color and Wild Tokens.

Tips

Because your color is hidden from everyone else, you might want to bluff and make it appear that you are trying for a row of another color. But be careful! You don't want to accidentally help out another player too much!
